IMPROVING CLINICAL DECISION MAKING

Welcome

Dear colleagues, dear friends,

Welcome to Amsterdam!

Over the past months, the patient case challenges have set the stage for what lies ahead. During the next two days, we will focus on one key question: **How can the latest evidence be translated into better care for patients with renal and bladder cancer?**

To explore this, we have brought together an international multidisciplinary faculty to present the latest data and discuss their implications for daily clinical practice in an interactive setting.

We encourage you to challenge perspectives, exchange ideas, and share your experiences with colleagues and experts. We hope you leave Amsterdam with new insights and practical takeaways that you can immediately apply in your practice.

Welcome to RENALC and BLADDR 2026 and enjoy the meeting.
